

In The Claims:

Please amend claims : 1, 4-9, 14-18, 25-26, 33, 35, 41

Please note claims cancelled : 2- 3, 10-13, 19-24, 29-30

1. (Currently amended) A mount ~~plurality of mounts~~ releasably adhered to a single sheet of a backing material, ~~the each~~ mount consisting of a single layer of plastic such as PVC and being a mount for mounting a sheet object ~~paper~~ to glass, and comprising a body having a first surface carrying an adhesive coating which adheres ~~capable of adhering~~ the mount to part of the surface of a sheet object ~~of paper~~ to form a mountable arrangement, and a second surface which secures ~~capable of securing~~ such a mountable arrangement directly to glass without adhesive, by the well-known "cling" properties of such PVC which has been rendered soft by plasticiser additives.

2. (Cancelled)

3. (Cancelled)

4. (Currently amended) A mount ~~plurality of mounts~~ according to claim 1, wherein the first and second surfaces of the ~~each~~ mount are mutually opposite.

5. (Currently amended) A mount ~~plurality of mounts~~ according to claim 1, wherein the first surface of ~~the each~~ mount adheres the mount to only a part of one surface of the sheet object ~~of paper~~ to form the mountable arrangement.

6. (Currently amended) A mount ~~plurality of mounts~~ according to claim 1, wherein ~~the each~~ mount releasably secures ~~is capable of releasably securing~~ the mountable arrangement directly to glass.

7. (Currently amended) A mount ~~plurality of mounts~~ according to claim 1, wherein the first or second surface of ~~the each~~ mount is flat.

8. (Currently amended) A mount ~~plurality of mounts~~ according to claim 1, wherein ~~the each~~ mount is flexible.

9. (Currently amended) A mount ~~plurality of mounts~~ according to claim 1, wherein ~~the each~~ mount is transparent.

10. (Cancelled)

11. (Cancelled)

12. (Cancelled)

13. (Cancelled)

14. (Currently amended) A mount ~~plurality of mounts~~ according to claim 1, wherein the thickness of ~~the each~~ mount is up to 2 mm.

15. (Currently amended) A mount ~~plurality of mounts~~ according to claim 14, wherein

the second surface area of ~~the each~~ mount is in the range 100mm² to 900mm².

16. (Currently amended) A mount ~~plurality of mounts~~ according to claim 1, wherein the first or second surface of ~~the each~~ mount is square, rectangular, triangular or circular.

17. (Currently amended) A mount ~~plurality of mounts~~ according to claim 1, wherein the second surface of ~~the each~~ mount does not adhere ~~is not capable of adhering~~ the mount to paper.

18. Currently amended A mount ~~plurality of mounts~~ according to claim 1, wherein ~~the each~~ mount comprises a pigment material.

19. (Cancelled)

20. (Cancelled).

21. (Cancelled)

22. (Cancelled)

23. (Cancelled)

24. (Cancelled)

25. (Currently amended) A mount for mounting a sheet object ~~paper~~ to glass, consisting of a single layer of plastic such as PVC and having a first surface carrying an adhesive coating which adheres ~~capable of releasably adhering~~ the mount to a sheet object ~~a sheet of paper~~ permanently or releasably to form a mountable arrangement and a second surface which secures ~~capable of securing~~ such a mountable arrangement directly to glass without adhesive by the well-known "cling" properties of such PVC which has been rendered soft by plasticiser additives; where the first and second surfaces are mutually opposite.

26. (Currently amended) A mount according to claim 25, wherein the first surface carrying an adhesive coating, adheres the mount to only a part of one surface of a sheet object ~~a sheet of paper~~ to form a mountable arrangement.

27. (Original) A mount according to claim 25, wherein the first or second surface of the mount is flat.

28. (Original) A mount according to claim 25, wherein the mount is flexible.

29. (Cancelled)

30. (Cancelled)

31. (Original) A mount according to claim 25, wherein the thickness of the mount is up to 2mm.

32. (Original) A mount according to claim 31, wherein the second surface area of the mount is in the range 100mm² to 900mm².

33. (Currently amended) A mount according to claim 25, wherein the second surface of the mount does not adhere ~~is not capable of adhering~~ the mount to paper.

34. (Original) A mount according to claim 25, wherein the first surface of the mount is

adhered releasably to a backing material.

35. (Currently amended) A mount according to claim 25, wherein the entire surface of the mount is adhered to less than half of the area of a surface of a sheet object of paper for permitting the said sheet object of paper to be mounted to glass.

36. (Previously presented) A method for securing a first material to a second material, comprising:

- releasably adhering a first surface of a mount to the first material with an adhesive coating carried by the first surface, wherein the mount and first material form a mountable arrangement; and
- securing a second surface of the mount to the second material without adhesive, where the first and second surfaces are mutually opposite and the mount consists of a single layer of plastic such as PVC.

37. (Previously Presented) The method according to claim 36, wherein the first material is a paper-based material.

38. (Previously Presented) The method according to claim 36, wherein the second material is a glass-based material.

39. (Previously Presented) The method according to claim 36, wherein the second material has a smooth surface.

40 (Previously presented) A method for securing a first material to a second material, comprising:

- adhering a first surface of a mount to a part of one surface of a sheet of paper with an adhesive coating carried by the first surface, wherein the mount and the sheet of paper form a mountable arrangement; and
- securing a second surface of the mount to glass without adhesive, where the first and second surfaces are mutually opposite and each mount consists of a single layer of plastic such as PVC.

41. (Currently amended) A mount arrangement for mounting paper to glass comprising:

a plurality of ~~or~~ mounts, each mount consisting of a single layer of plastic such as PVC and having a first surface carrying an adhesive coating which adheres ~~capable of adhering~~ the mount to a sheet of paper to form a mountable arrangement, and a second surface capable of securing such a mountable arrangement directly to glass without adhesive; where the first and second surfaces are mutually opposite.
